Barn wood?

This is 100% naturally weathered reclaimed wood made in the Ukraine. This wood is full of character with knotholes, nail holes, dents, and dings that make it stand apart from anything you can buy in the big box stores!

✓100% reclaimed wood, naturally weathered, Unique Barn Wood character & patina

✓Easy to install, use construction adhesive and/or trim nails

✓Calculate square footage by multiplying height x width If you need help with this, just drop us a line!

✓ Tools needed: level, tape measure, hand saw or miter saw, hammer & nails, or trim nailer

✓This is NOT new wood made to look old! These boards are beautiful and naturally aged – giving your wall a much more authentic barn wood look.

Barnboard wall panels are a unique material for finishing walls, ceilings and other surfaces. They are worth ordering because they have a lot of advantages:

- + they do not deform;
- + differ in high durability;
- + easy to use and allow you to quickly complete the decoration of large spaces;
- + the material is durable;
- + natural wood is used, so the panels are environmentally friendly and safe.

Nature itself has worked to create an excellent finishing material.

The natural aging of wood occurred gradually, under the influence of the sun, rain, wind and other natural factors.

After dismantling the old buildings, the craftsmen improve the properties of the barn boards: they are cleaned, polished, dried against mold, fungus and pests.

The boards are then passed through machines to give a flat, tiled board surface for easy wall mounting or decoration.

Thanks to this, we can confidently say that when you order barn board wall panels from us, you will not find a similar finish somewhere!

Our specialists manually process the boards. They select the best specimens that are well preserved. Each passes through the skillful hands of the master.
